SKILLS

JavaScript, TailwindCSS, SASS, React.js, Next.js, ChakraUI, Redux, Python, Flask, PostgreSQL, Postman, Git, Github, AWS, Kubernetes, Docker

PROJECTS

Shortly — https://shoortly.netlify.app/
- Converted a design mockup into a web layout using React.js and ChakraUI.
- Minified long URL links by utilizing axios to send requests to shrtcode API.
- Persisted and retrieved shortened URL links from local storage.

World Countries — https://world-countries-plum.vercel.app/
- Created a mobile first web layout from a design mockup using Next.js and ChakraUI.
- Achieved faster image loading with Next.js to improve overall website performance.
- Implemented color scheme toggling between light/dark mode.

Fyyur — Github
- Modelled relationships between database models with PostgreSQL.
- Made database queries with SQLAlchemy ORM to prevent potential threats like SQL Injection.

Trivia app — Github
- Built APIs to allow the frontend to make interactions with the data on the backend.
- Wrote unit tests to ensure all functionalities work as intended while introducing new features.

WORK EXPERIENCE

Frontend Developer   June 2022 - till Date
Fiverr, Remote
- Built custom landing pages for clients that were SEO friendly, fast and responsive across a wide range of devices.
- Understanding client's pain points to determine the best approach to deliver top notch websites.

EDUCATION
